

WALT using partitioning to help us add numbers.

Partition these numbers to make them easier to add together. Then use a numberline to add the number in chunks. Use a ruler to draw your numberline in pencil, in your books.

For Example: $42 + 21$

I could write: $42 + (20 + 1)$

And I could draw it on a numberline:

So my answer is 63. Now your turn!

1) $51 + 47 =$

2) $23 + 16 =$

3) $41 + 35 =$

4) $57 + 31 =$

5) $38 + 11 =$

6) $72 + 22 =$
